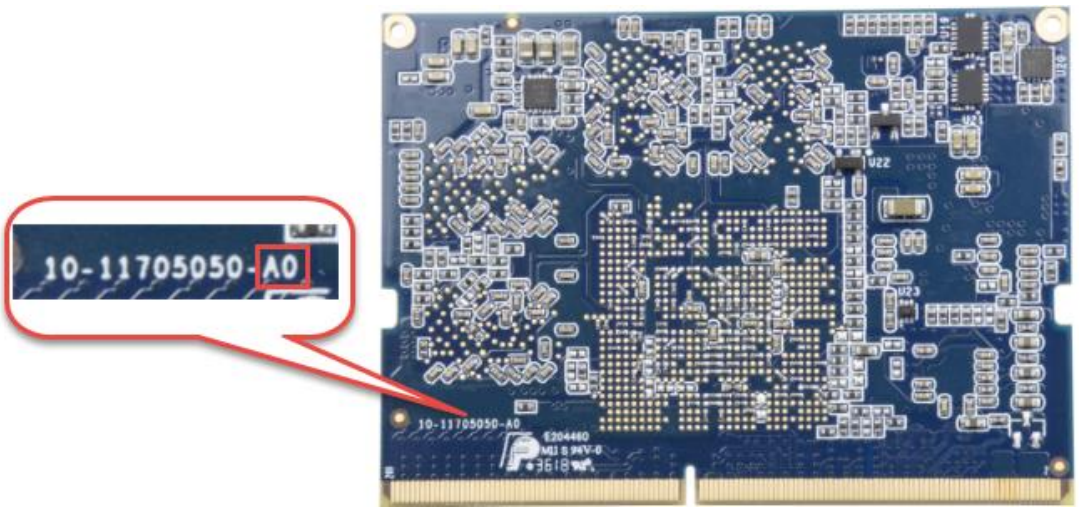
■ How to Find TSoM Evaluation Kit Revision?

1. On the bottom view of the TSoM module PCB, there is a seal mark for the board hardware version.



2. If there is an "A" printed at the specified location (shown above), it stands for version A. If the character is “B”, it stands for version B.

■ Board Revision Details

Revision	Description
A	First released
B	1. Add SW2 for TSoM module, set the FPGA configuration mode to: • AS (Boot from EPCS) • FPPx32 mode (For Linux) 2. Add SW2 for TSoM-BB, set the HPS boot source to: • QSPI flash • SD card or eMMC.
